

Tellin' Time Clock

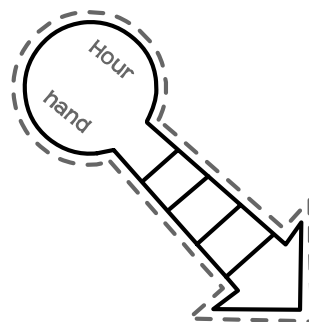

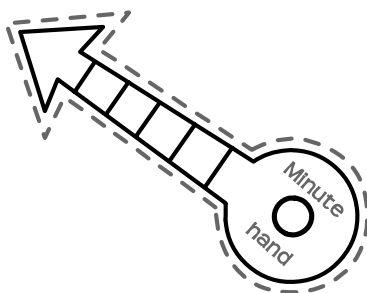

(See instructions sheet for directions)

2. Ronald® (fastener cover)

3. Minute hand

4. Hour hand

Tellin' Time Clock

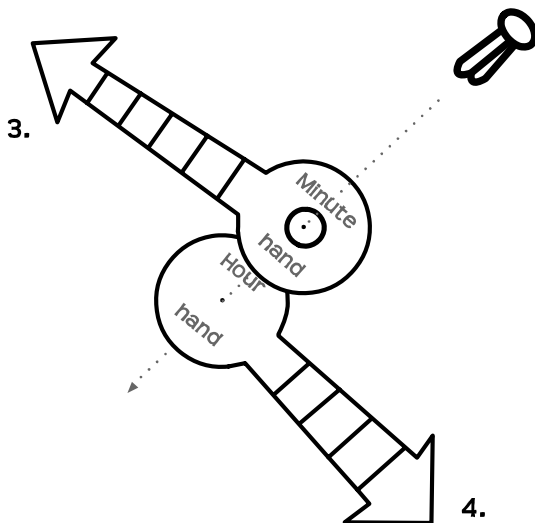

Use crayons or markers to color in your Tellin' Time Clock before you put it together. It's a good idea to color the minute hand and the second hand different colors. That way it's easy to tell them apart!

Once you're finished coloring, ask your Mom or Dad to help you cut out all the parts. Don't forget to cut the holes you'll need to fasten the parts together!

Now just follow these easy directions:

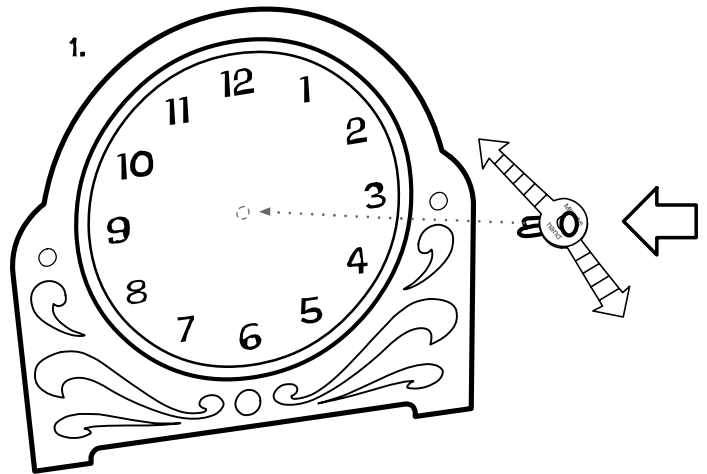

Step 1

Thread an ordinary paper fastener through the two clock hands (3 & 4).

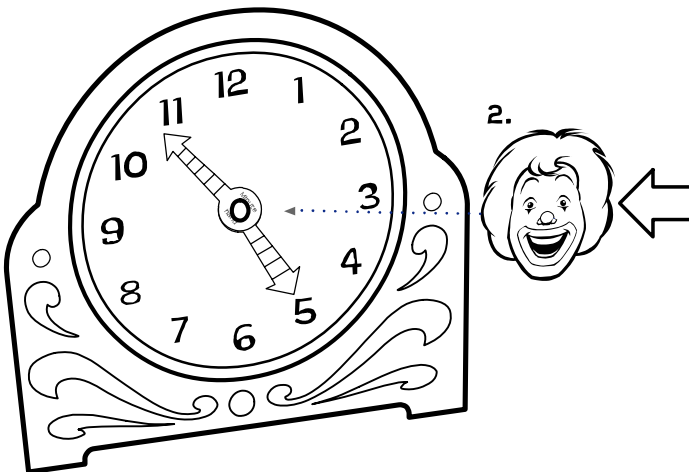

Step 2

Now attach the two hands to the clock face by pushing the fastener through the hole in the center of the clock face (1). Flatten the fastener tabs against the back of the clock to secure the parts together.

Step 3

Use a piece of tape or glue to attach the Ronald® head (2) to the top of the fastener.

Good job - you're finished!

Tape the clock down onto a piece of cardboard or construction paper to make it more sturdy. Ask your Mom or Dad to quiz you on what time it is!
